REASONS FOR ALLOWANCE

1. Claims 1-7 and 13-24 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a reflective active-matrix addressed liquid crystal display (LCD) device comprising a combination of various elements as claimed, more specifically, a combination of the followings: an upper electrode between the insulation layer and the lower insulation film, the upper electrode being provided for each pixel and located in a region wherein the reflection film is provided, the upper electrode being electrically coupled to a source electrode of the switching element; a lower electrode provided between the second substrate and the lower insulation film, the lower electrode forming a storage capacitance with the upper electrode; and the irregularly configured surface of the insulation layer comprises a plurality of substantially linear projections, a plurality of recesses surrounded by the substantially linear projections (see at least figure 4A of the present application).

Kanou ('718, same assignee) discloses a reflective active-matrix LCD device comprising the irregularly configured surface of the insulation layer having a plurality of linear projections, a reflection film formed on the insulation layer and having an irregular surface. However Kanou fails to disclose the particular details of the insulation layer in combination with the electrodes' (upper and lower) particular details, as recited in the present claimed invention.

Art Unit: 2871

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
